

## **ABSTRACT**

A toys bracing bracket for mounting on a playpen or a play pad is detachable. It mainly includes a central pivot dock that has a first anchor section and a second anchor section to couple with a plurality of connection rods. Each of the connection rods is  
5 coupled with an elastic element so that the connection rods may be easily pulled and extended for mounting on the playpen or play pad, or be folded easily to facilitate carrying and storing, and to enhance safety.
